Asthma is the leading chronic disease in children and is the most common reason for school absenteeism. If left untreated it can lead to frequent hospital visits and low self-esteem.

Better understand and support children who have asthma with Health Educator **Troy Tournat, Breathe California of the Bay Area Asthma Services** who will cover the most relevant issues surrounding asthma episodes:

- Understand lung function during an attack
- Prevent asthma episodes
- Identify and reduce triggers

Dinner provided. Training will begin promptly at 6:30pm.

Child Care Providers interested in attending trainings at Child Care Links **must provide a Workforce Registry ID Number** to register. Visit www.careregistry.org to create your account today!
